***Drawings***

1. The drawings filed on February 11, 2004 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

***Allowable Subject Matter***

2. The following is a statement of reasons for allowance: Howard teaches a pencil beam antenna that is capable of transmitting electromagnetic energy beyond the range of a fan beam antenna such that at a given distance the signal propagated from said pencil beam antenna has a greater signal strength than a signal propagated from said fan antenna (Column 1 lines 54 – 64). **The antenna of Howard however is a Plan Position Indicator (PPI) radar for commercial aviation. Howard also does not teach said radar antenna operating in the millimeter wave range thus there is no motivation from Howard to suggest a modification of applicant's millimeter wave system with said radar antenna of Howard.** Claims 2 – 9 depend on Claim 1 and Claims 10 are allowed for the same reason as set forth above.

There is prior art teaching a receive antenna mechanism that includes a receiver that processes the received signals as evidenced by Tamil (Column 6 lines 62 – 67, Column 7 lines 1 – 3) but the prior art of record fails to specifically teach **a receive antenna mechanism that includes a plurality of receive signal processing channels that each have a first mixer for separation of a first set of IF signals, and**

**wherein each of said mixers is coupled to a common LO signal generator.** Claims 12 – 16 depend on Claim 11 and Claims 18 – 22 depend on Claim 17 therefore examiner gives the same reason as set forth above.
